FUEL SURCHARGE MECHANISM

Fuel surcharge (FSC) is computed monthly as a percentage of the base fare, linked to the average retail diesel price published by the Indian Oil Corporation for the preceding month. A baseline diesel price of Rs. 92 per litre is used as the reference point; for every Rs. 2 increase above this baseline, FSC increases by 1.5% of the base fare. The applicable FSC percentage for the current billing month is communicated separately via the monthly rate circular and is not included in the per-km rates listed above.
